Schema(s)

Main schema job.xsd

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	Type definitions of the so called Job part of the FaxService. Job service is used to control fax jobs. Typdefinitionen des sogenannten Job-Teils des FaxService. Der Job-Service wird für die Steuerung der Faxjobs verwendet.
Properties	attribute form default: unqualified element form default: qualified
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element(s)

Element jt:GetList

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	Message used to request a list of current jobs. Nachricht um eine Liste aktueller Jobs anzufordern.
Diagram	Properties	content: complex
Model	jt:authKey , jt:jobTitle{0,1} , jt:status{0,1} , jt:period{0,1}
Children	jt:authKey, jt:jobTitle, jt:period, jt:status
Instance	<jt:GetList> <jt:authKey>{1,1}</jt:authKey>

	<jt:jobTitle>{0,1}</jt:jobTitle> <jt:status>{0,1}</jt:status> <jt:period>{0,1}</jt:period> </jt:GetList>
Source	<element name="GetList"> <annotation> <documentation xml:lang="en">Message used to request a list of current jobs.</documentation> <documentation xml:lang="de">Nachricht um eine Liste aktueller Jobs anzufordern.</documentation> </annotation> <complexType> <sequence> <element name="authKey" type="string"> <annotation> <documentation xml:lang="en">Authorization key.</documentation> <documentation xml:lang="de">Autorisierungschlüssel.</documentation> </annotation> </element> <element name="jobTitle" type="string" minOccurs="0"> <annotation> <documentation xml:lang="en">Name of the requested jobs.</documentation> <documentation xml:lang="de">Name der angeforderden Jobs.</documentation> </annotation> </element> <element name="status" type="string" minOccurs="0"> <annotation> <documentation xml:lang="en">State in which the requested jobs are.</documentation> <documentation xml:lang="de">Zustand in dem sich die angeforderde Jobs befinden.</documentation> </annotation> </element> <element name="period" type="jt:period" minOccurs="0"> <annotation> <documentation xml:lang="en">Time period within the time to send of the requested jobs is.</documentation> <documentation xml:lang="de">Zeitraum in dem die Versandzeit des angeforderten Jobs liegt.</documentation> </annotation> </element> </sequence> </complexType> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element jt:GetList / jt:authKey

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	Authorization key. Autorisierungschlüssel.
Diagram	Type	string
Properties	content: simple
Source	<element name="authKey" type="string"> <annotation> <documentation xml:lang="en">Authorization key.</documentation> <documentation xml:lang="de">Autorisierungschlüssel.</documentation> </annotation> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element jt:GetList / jt:jobTitle

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	Name of the requested jobs. Name der angeforderden Jobs.
Diagram	

Type	string
Properties	content: simple minOccurs: 0
Source	<element name="jobTitle" type="string" minOccurs="0"> <annotation> <documentation xml:lang="en">Name of the requested jobs.</documentation> <documentation xml:lang="de">Name der angeforderden Jobs.</documentation> </annotation> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element jt:GetList / jt:status

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	State in which the requested jobs are. Zustand in dem sich die angeforderde Jobs befinden.
Diagram	Type	string
Properties	content: simple minOccurs: 0
Source	<element name="status" type="string" minOccurs="0"> <annotation> <documentation xml:lang="en">State in which the requested jobs are.</documentation> <documentation xml:lang="de">Zustand in dem sich die angeforderde Jobs befinden.</ documentation> </annotation> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element jt:GetList / jt:period

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	Time period within the time to send of the requested jobs is. Zeitraum in dem die Versandzeit des angeforderten Jobs liegt.
Diagram	Type	jt:period
Properties	content: complex minOccurs: 0
Model	jt:from , jt:until
Children	jt:from, jt:until
Instance	<jt:period> <jt:from>{1,1}</jt:from> <jt:until>{1,1}</jt:until> </jt:period>
Source	<element name="period" type="jt:period" minOccurs="0"> <annotation> <documentation xml:lang="en">Time period within the time to send of the requested jobs is.</documentation> <documentation xml:lang="de">Zeitraum in dem die Versandzeit des angeforderten Jobs liegt.</documentation> </annotation> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element jt:period / jt:from

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	Time the period begins. Anfangszeit des Zeitraums.
Diagram	
Type	dateTime
Properties	content: simple minOccurs: 1
Source	<element name="from" type="dateTime" minOccurs="1"> <annotation> <documentation xml:lang="en">Time the period begins.</documentation> <documentation xml:lang="de">Anfangszeit des Zeitraums.</documentation> </annotation> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element jt:period / jt:until

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	Time the period ends. Endzeit des Zeitraums.
Diagram	
Type	dateTime
Properties	content: simple minOccurs: 1
Source	<element name="until" type="dateTime" minOccurs="1"> <annotation> <documentation xml:lang="en">Time the period ends.</documentation> <documentation xml:lang="de">Endzeit des Zeitraums.</documentation> </annotation> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element jt:GetListResponse

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	Message to deliver a list of jobs matching a GetList request. Nachricht um eine Liste von Jobs passend zu einer GetList-Anforderung zu liefern.
Diagram	
Properties	content: complex
Model	jt:jobList
Children	jt:jobList
Instance	<jt:GetListResponse> <jt:jobList>{1,1}</jt:jobList> </jt:GetListResponse>
Source	<element name="GetListResponse"> <annotation> <documentation xml:lang="en">Message to deliver a list of jobs matching a GetList request.</documentation> <documentation xml:lang="de">Nachricht um eine Liste von Jobs passend zu einer GetList-Anforderung zu liefern.</documentation> </annotation> <complexType> <sequence> <element name="jobList" type="jt:JobList"> <annotation>

	<documentation xml:lang="en">List of jobs.</documentation> <documentation xml:lang="de">Liste von Jobs.</documentation> </annotation> </element> </sequence> </complexType> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element `jt:GetListResponse / jt:jobList`

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	List of jobs. Liste von Jobs.
Diagram	Type	jt:JobList
Properties	content: complex
Model	jt:jobList*
Children	jt:jobList
Instance	<jt:jobList> <jt:jobList>{0,unbounded}</jt:jobList> </jt:jobList>
Source	<element name="jobList" type="jt:JobList"> <annotation> <documentation xml:lang="en">List of jobs.</documentation> <documentation xml:lang="de">Liste von Jobs.</documentation> </annotation> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element `jt:JobList / jt:jobList`

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	Job entry. Job-Eintrag.
Diagram	
Type	jt:APIJob
Properties	content: complex minOccurs: 0 maxOccurs: unbounded
Model	jt:jobId , jt:jobTitle , jt:status , jt:errorCode , jt:timeToSend , jt:numberOfScheduled , jt:numberOfSuccessful , jt:numberOfErrors , jt:numberOfPages
Children	jt:errorCode, jt:jobId, jt:jobTitle, jt:numberOfErrors, jt:numberOfPages, jt:numberOfScheduled, jt:numberOfSuccessful, jt:status, jt:timeToSend
Instance	<jt:jobList> <jt:jobId>{1,1}</jt:jobId> <jt:jobTitle>{1,1}</jt:jobTitle> <jt:status>{1,1}</jt:status> <jt:errorCode>{1,1}</jt:errorCode> <jt:timeToSend>{1,1}</jt:timeToSend> <jt:numberOfScheduled>{1,1}</jt:numberOfScheduled> <jt:numberOfSuccessful>{1,1}</jt:numberOfSuccessful> <jt:numberOfErrors>{1,1}</jt:numberOfErrors> <jt:numberOfPages>{1,1}</jt:numberOfPages> </jt:jobList>
Source	<element name="jobList" minOccurs="0" maxOccurs="unbounded" type="jt:APIJob"> <annotation> <documentation xml:lang="en">Job entry.</documentation> <documentation xml:lang="de">Job-Eintrag.</documentation> </annotation> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element jt:APIJob / jt:jobId

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	Identity of the job. Identität des Jobs.
Diagram	Type	long
Properties	content: simple
Source	<element name="jobId" type="long"> <annotation> <documentation xml:lang="en">Identity of the job.</documentation> <documentation xml:lang="de">Identität des Jobs.</documentation> </annotation> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element jt:APIJob / jt:jobTitle

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	Name of the job. Name des Jobs.
Diagram	
Type	string
Properties	content: simple
Source	<element name="jobTitle" type="string"> <annotation> <documentation xml:lang="en">Name of the job.</documentation> <documentation xml:lang="de">Name des Jobs.</documentation> </annotation> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element jt:APIJob / jt:status

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	State of the job (new, ready, scheduling, scheduled, processing, finished, error) Zustand des Jobs (new, ready, scheduling, scheduled, processing, finished, error)
Diagram	
Type	string
Properties	content: simple
Source	<element name="status" type="string"> <annotation> <documentation xml:lang="en">State of the job (new, ready, scheduling, scheduled, processing, finished, error)</documentation> <documentation xml:lang="de">Zustand des Jobs (new, ready, scheduling, scheduled, processing, finished, error)</documentation> </annotation> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element jt:APIJob / jt:errorCode

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	Error code: Zero if successful; see table for details. Fehlercode: Null im Erfolgsfall; Details gemäß Liste.
Diagram	Type	int
Properties	content: simple
Source	<element name="errorCode" type="int"> <annotation> <documentation xml:lang="en">Error code: Zero if successful; see table for details.</documentation> <documentation xml:lang="de">Fehlercode: Null im Erfolgsfall; Details gemäß Liste.</documentation> </annotation> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element jt:APIJob / jt:timeToSend

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	Scheduled time to send the fax to recipients. Zeit zu der geplant ist, dass Fax an die Empfänger zu geschicken.
Diagram	Type	dateTime
Properties	content: simple
Source	<element name="timeToSend" type="dateTime"> <annotation> <documentation xml:lang="en">Scheduled time to send the fax to recipients.</documentation> <documentation xml:lang="de">Zeit zu der geplant ist, dass Fax an die Empfänger zu geschicken.</documentation> </annotation> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element jt:APIJob / jt:numberOfScheduled

Namespace	http://soap.fax-api.de/2.0/job/types

Annotations	Number of scheduled recipients. Anzahl geplanter Empfänger.
Diagram	Type	int
Properties	content: simple
Source	<element name="numberOfScheduled" type="int"> <annotation> <documentation xml:lang="en">Number of scheduled recipients.</documentation> <documentation xml:lang="de">Anzahl geplanter Empfänger.</documentation> </annotation> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element jt:APIJob / jt:numberOfSuccessful

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	Number of successful transmitted faxes to recipients. Anzahl der erfolgreich an Empfänger versendeter Faxdokumente.
Diagram	Type	int
Properties	content: simple
Source	<element name="numberOfSuccessful" type="int"> <annotation> <documentation xml:lang="en">Number of successful transmitted faxes to recipients.</ documentation> <documentation xml:lang="de">Anzahl der erfolgreich an Empfänger versendeter Faxdokumente.</documentation> </annotation> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element jt:APIJob / jt:numberOfErrors

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	Number of not reachable recipients. Anzahl der nicht erreichbaren Empfänger.
Diagram	
Type	int
Properties	content: simple
Source	<element name="numberOfErrors" type="int"> <annotation> <documentation xml:lang="en">Number of not reachable recipients.</documentation> <documentation xml:lang="de">Anzahl der nicht erreichbaren Empfänger.</documentation> </annotation> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element jt:APIJob / jt:numberOfPages

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	Number of pages per recipient. Anzahl der Seiten pro Empfänger.
Diagram	

Type	int
Properties	content: simple
Source	<element name="numberOfPages" type="int"> <annotation> <documentation xml:lang="en">Number of pages per recipient.</documentation> <documentation xml:lang="de">Anzahl der Seiten pro Empfänger.</documentation> </annotation> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element jt:GetJob

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	Message to specifically request a single job by its identity. Nachricht um genau einen Job mittels seiner Identität anzufordern.
Diagram	Properties	content: complex
Model	jt:authKey , jt:jobId
Children	jt:authKey, jt:jobId
Instance	<jt:GetJob> <jt:authKey>{1,1}</jt:authKey> <jt:jobId>{1,1}</jt:jobId> </jt:GetJob>
Source	<element name="GetJob"> <annotation> <documentation xml:lang="en">Message to specifically request a single job by its identity.</documentation> <documentation xml:lang="de">Nachricht um genau einen Job mittels seiner Identität anzufordern.</documentation> </annotation> <complexType> <sequence> <element name="authKey" type="string"> <annotation> <documentation xml:lang="en">Authorization key.</documentation> <documentation xml:lang="de">Autorisierungschlüssel.</documentation> </annotation> </element> <element name="jobId" type="long"> <annotation> <documentation xml:lang="en">Identity of the requested job.</documentation> <documentation xml:lang="de">Identität des angeforderten Jobs.</documentation> </annotation> </element> </sequence> </complexType> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element jt:GetJob / jt:authKey

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	Authorization key. Autorisierungschlüssel.
Diagram	Type	string
Properties	content: simple
Source	<element name="authKey" type="string">

	<annotation> <documentation xml:lang="en">Authorization key.</documentation> <documentation xml:lang="de">Autorisierungschlüssel.</documentation> </annotation> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element jt:GetJob / jt:jobId

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	Identity of the requested job. Identität des angeforderten Jobs.
Diagram	
Type	long
Properties	content: simple
Source	<element name="jobId" type="long"> <annotation> <documentation xml:lang="en">Identity of the requested job.</documentation> <documentation xml:lang="de">Identität des angeforderten Jobs.</documentation> </annotation> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element jt:GetJobResponse

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	Message to deliver a specific job request. Nachricht um einen bestimmten Job zu einer Anfrage zu liefern.
Diagram	
Properties	content: complex
Model	jt:apiJob
Children	jt:apiJob
Instance	<jt:GetJobResponse> <jt:apiJob>{1,1}</jt:apiJob> </jt:GetJobResponse>
Source	<element name="GetJobResponse"> <annotation> <documentation xml:lang="en">Message to deliver a specific job request.</ documentation> <documentation xml:lang="de">Nachricht um einen bestimmten Job zu einer Anfrage zu liefern.</documentation> </annotation> <complexType> <sequence> <element name="apiJob" type="jt:APIJob"> <annotation> <documentation xml:lang="en">Description of job.</documentation> <documentation xml:lang="de">Jobbeschreibung.</documentation> </annotation> </element> </sequence> </complexType> </element>
Schema location	file:/C:/Users/rattke/Zend/workspaces/Default/SoapService/main/htdocs/job.xsd

Element jt:GetJobResponse / jt:apiJob

Namespace	http://soap.fax-api.de/2.0/job/types
Annotations	Description of job. Jobbeschreibung.

Diagram	Type	jt:APIJob
Properties	content: complex
Model	jt:jobId , jt:jobTitle , jt:status , jt:errorCode , jt:timeToSend , jt:numberOfScheduled , jt:numberOfSuccessful , jt:numberOfErrors , jt:numberOfPages
Children	jt:errorCode, jt:jobId, jt:jobTitle, jt:numberOfErrors, jt:numberOfPages, jt:numberOfScheduled, jt:numberOfSuccessful, jt:status, jt:timeToSend
Instance	<jt:apiJob> <jt:jobId>{1,1}</jt:jobId> <jt:jobTitle>{1,1}</jt:jobTitle> <jt:status>{1,1}</jt:status> <jt:errorCode>{1,1}</jt:errorCode> <jt:timeToSend>{1,1}</jt:timeToSend> <jt:numberOfScheduled>{1,1}</jt:numberOfScheduled> <jt:numberOfSuccessful>{1,1}</jt:numberOfSuccessful> <jt:numberOfErrors>{1,1}</jt:numberOfErrors> <jt:numberOfPages>{1,1}</jt:numberOfPages> </jt:apiJob>
